## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-18, drawn to a method of culturing eukaryotic cells.

Group II, claim(s) 19-28, drawn to fibers with an open-topped channel.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding novel special technical features for the following reason. The claimed special technical feature of a fiber with an open-topped channel for culturing cells is anticipated by The University of Glasgow et al. (WO 95/22305). The University of Glasgow discloses a fiber with open-topped channel that is used for culturing cells (see page 7, last paragraph, to page 10, line 4, and the Abstract). As evidenced by the cited reference's anticipation of certain claimed embodiments, the inventions of Groups I and II do not share a special technical feature which defines them over the prior art. Therefore, a holding of lack of unity of invention is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 1651

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
